The following listing of claims will replace all prior versions and listings of claims in this application.

Listing of Claims:

Claim 1 (currently amended): An antisense oligonucleotide 8 to 50 nucleobases in length targeted to nucleobases ~~703 through~~ 969 through 992 of a 3'-untranslated region of a nucleic acid molecule encoding human phospholipase A2 group V (SEQ ID NO: 3), wherein said compound specifically hybridizes with said nucleic acid molecule encoding phospholipase A2 group V and inhibits the expression of phospholipase A2 group V, and wherein the antisense oligonucleotide comprises at least one modified internucleoside linkage.

Claims 2-4 (canceled).

Claim 5 (previously presented): The compound of claim 1 wherein the modified internucleoside linkage is a phosphorothioate linkage.

Claim 6 (previously presented): The compound of claim 1 wherein the antisense oligonucleotide comprises at least one modified sugar moiety.

Claim 7 (original): The compound of claim 6 wherein the modified sugar moiety is a 2'-O-methoxyethyl sugar moiety.
